What buyers weigh vs. what they track

WHAT DRIVES AI INFRASTRUCTURE PURCHASES

Only 44% of enterprises rigorously track compute cost or ROI.

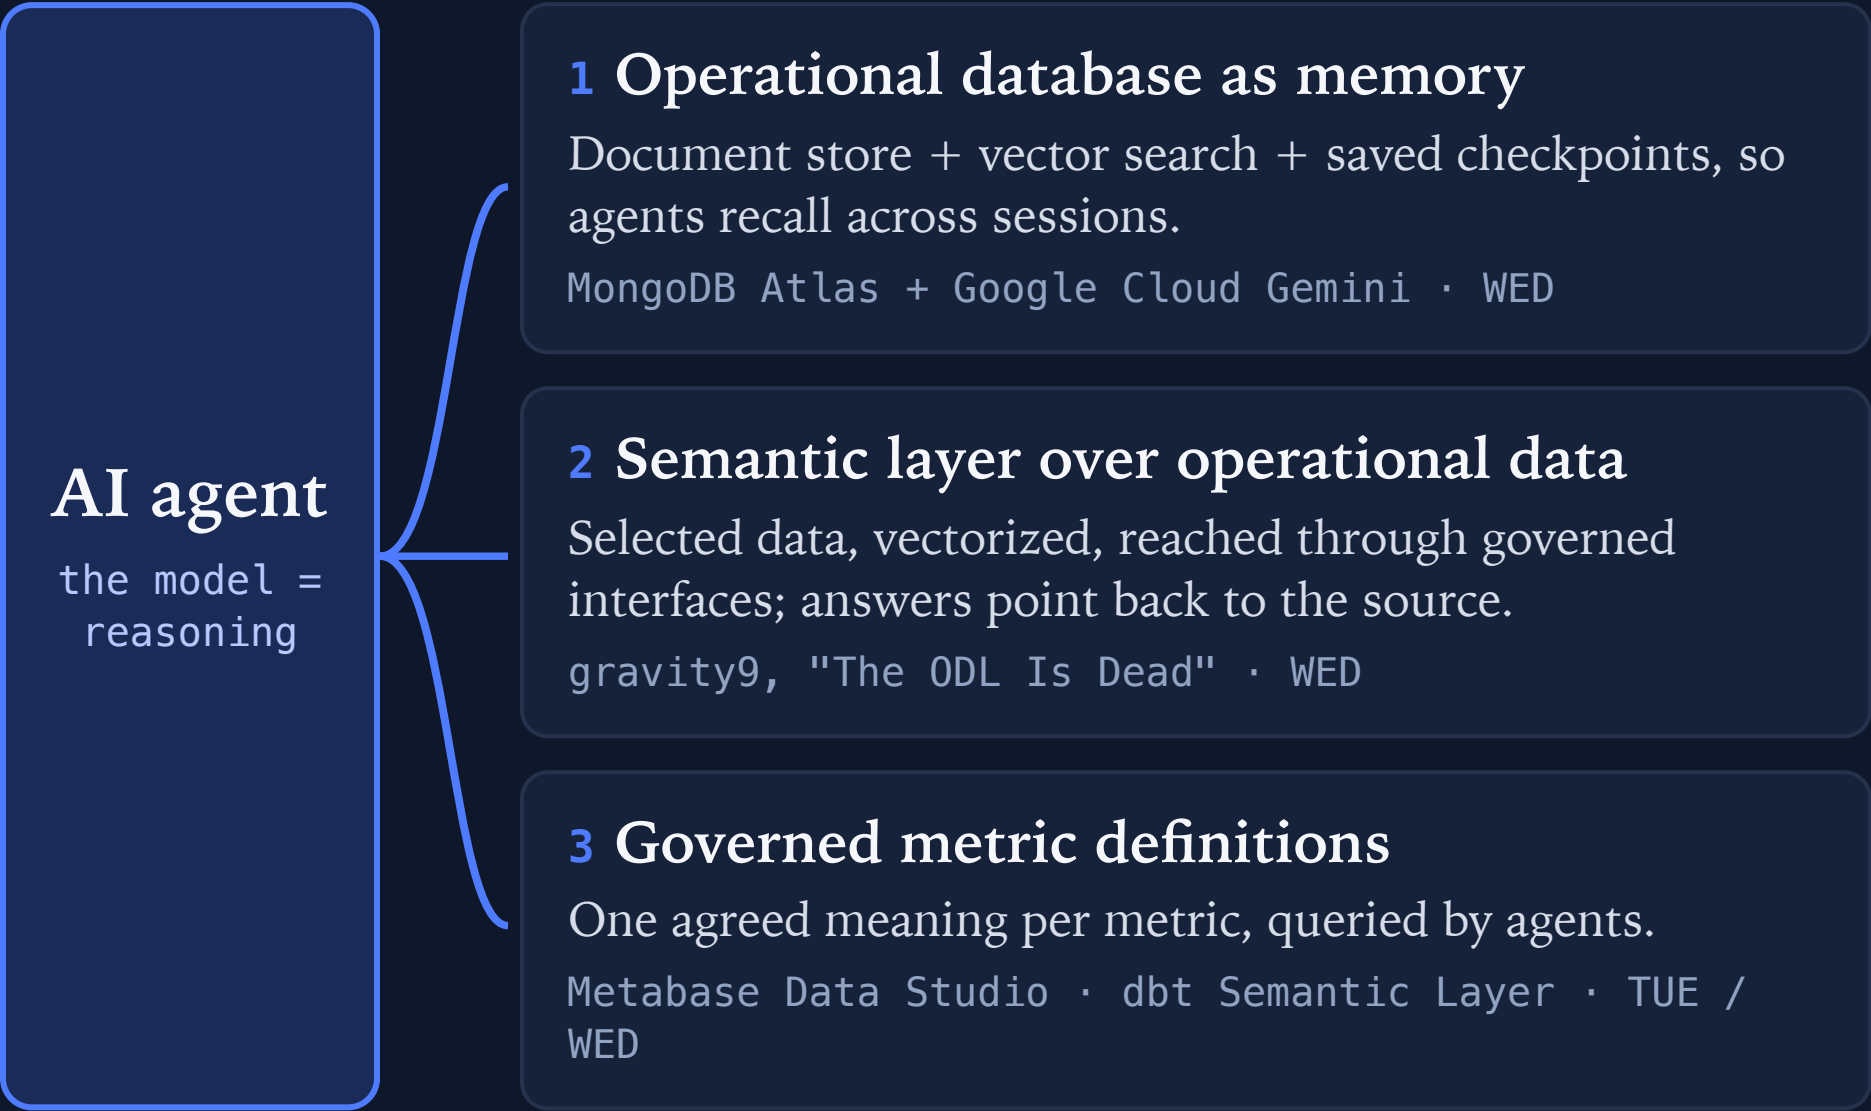

OPEN-WEIGHT SHARE OF VERCEL AI GATEWAY TOKENS

Price per token fell 23.2% in August, the third straight monthly drop.

Open-weight = a model whose weights anyone can download and run. **TCO** = the full cost of running it, not just the per-call price.

Three homes for an agent's context

MCP = a standard plug linking AI assistants to tools and data

Metabase MCP server (v60, Apr 2026)	MongoDB Atlas Managed MCP Server (GA Aug 13, 2026)	dbt MCP server
--	--	----------------

Context rot = answers degrading as an agent's prompt fills with too much history.
