

A CONTRARIAN READ FROM REVGENIUS

AI is about to make email *valuable* again.

The "cold email is dead" story assumes a human on the other end. The moment the buyer is an AI, the math inverts.

Human buyer → AI-enhanced buyer

Humans fatigue. Filters *don't*.

THE OLD LOOP · HUMAN BUYER

THE NEW LOOP · AI-ENHANCED BUYER

NO FATIGUE An AI buyer doesn't drown in volume — *it mines it.*

Dead for the generic. Reborn for the *relevant*.

SPRAY & PRAY

Dead

A tireless filter is merciless with generic noise. No inbox-overwhelm to hide in.

GENUINELY RELEVANT

More valuable than ever

Surfaced because it maps to a live priority — regardless of surrounding volume.

The old arms race was deliverability. The new one is *relevance* — ranking inside someone else's buying agent. Call it SEO for the buy-side.
