- Level Up With Lovable
- Voice Agent Hackathon

Source: event listings (Luma, Tessl, Snowflake, RevGenius), Nov 2026. Times ET.

Four streams, watch online

EVENT + HOW TO JOIN	WHAT GETS CHECKED	WHAT WOULD SETTLE IT
AI DevCon NYC (Tessl) YouTube, Tue	the merge	A speaker naming the method and baseline behind a vendor number
Snowflake Expedition, technical Tue	agent controls	GA, preview or roadmap, said out loud, for each control shown
Snowflake Expedition, GTM Wed	the marketing number	A budget that moved because an experiment beat the dashboard
Revolt! Demo Days (RevGenius) Wed + Thu	the CRM write	A live demo showing who approved the write, on realistic data

Source: event agendas and research briefs, Nov 2026.

Six rooms in New York

EVENT + HOW TO JOIN	WHAT GETS CHECKED	WHAT WOULD SETTLE IT
VirtusLab Mon	the merge gate	A stated threshold, and who owns it
AIMLC Tue	the proof	One line on what's established, one on what isn't
Agentics Spotlight Wed, NYU	the skill	A named failure signature for a skipped skill
Ghosts in the System Thu, Ro HQ	the reply at volume	A stated miss rate on urgent cases
Level Up With Lovable Fri AM	the shipped app	One task the tool still leaves to the builder
Voice Agent Hackathon Fri PM	the turn	A latency number measured on a real phone line

Two numbers, two different measurements

≈ 1 in 3

Zalando PRs auto-approved as low-risk.

WHAT IT MEASURES

The share of one company's PRs that a risk tier routes past human review, across 250+ teams.

METHOD

First-party and observational; methodology not disclosed.

Zalando Engineering, 2026-08-14

0.5%

AI-only-review merges at the median company.

WHAT IT MEASURES

Merges reviewed only by AI, across 1,300+ companies.

METHOD

Jellyfish's own dataset.

Jellyfish via R&D World, 2026-10-27

> One company's policy, one cross-company median. Neither is a controlled study.

Source: Zalando Engineering blog (2026-08-14); Jellyfish data as reported by R&D World (2026-10-27).

A person, a machine, or a metric

A person signs off

VirtusLab
(merge gate)

Revolt Day 1

Revolt Day 2
(CRM write approval)

A machine checks

AIMLC
(reported Lean check)

Agentics Spotlight
(skill pressure tests)

Level Up With Lovable
(SEO review)

A metric decides

Snowflake Expedition
(governed definitions, experiments vs attribution)

Voice Agent Hackathon
(judged on response time and turn-taking)

AI DevCon's nine talks and Ghosts in the System's panel span all three.
