

Nine sessions, four days, two formats

IN PERSON

ONLINE

MON

6:00pm

LeadDev New York
Meetup

New York Times Building

TUE

6:00pm

The New AI Computer:
An Evening with Zo

Zo Computer, Brooklyn

10:30am

How Attio uses Attio

11:00am

Beyond Integration
Licensing Cost

WED

6:00pm

CONTEXT

Postgres Tuning in the
Age of AI

Midtown

12:00pm

CONTEXT

Clay: Rebuilding the
Marketing Tech Stack

1:00pm

CONTEXT

Context is King

THU

10:00am–8:00pm

Frontier Build NYC

Microsoft Research lab

12:00pm

Signal Rich, Action Poor

RevGenius panel

4 in person · 5 online · all times ET · **context** = the Wednesday
context thread

Event pages linked in the first comment.

See. Do. Who checks?

ROOM	WHAT THE AGENT SEES	WHAT IT MAY DO	WHO CHECKS
LeadDev MON · ENG LEADERS	The codebase	Write code at speed; build, buy or "vibe" internal tools	Human reviewers, where AI pull requests wait longest
Zo TUE · CONSUMER	Files, email, calendar on an always-on cloud computer	Run code, read mail, edit files between visits	Open: sandboxing and prompt injection
Postgres WED · DATABASES	Curated stats, schema, stored query plans; no direct database connection	Recommend; read-only	A human applies the change
Frontier Build THU · SOFTWARE	Context a human supplies (Level 1)	Code in sandboxes, from tickets or schedules (Level 2)	Human (Level 1) → agentic reviewer + CI (Level 2)
Signal Rich THU · REVENUE	CRM plus calls and emails ("system of intelligence")	Edit CRM records ("system of action")	Read-only syncs, auto-pause, a forward-deployed human analyst

Sources: LeadDev + McKinsey (review lag); Zo pricing, OpenClaw via The Register; pganalyze MCP docs; Obvious event invite; Airspeed, Apollo release notes. Prompt injection = hidden text an agent treats as an instruction.

"Context," three ways, one Wednesday

12:00pm • online • Clay

Rebuilding the Marketing Tech Stack for the AI Era

LAYER: THE TOOL STACK

1:00pm • online

Context is King: How to build a system of context for AI

LAYER: A SYSTEM OF CONTEXT

6:00pm • Midtown • Ryan Booz (pganalyze)

Postgres Tuning in the Age of AI: Context Is Everything

LAYER: DATABASE TELEMETRY

WHAT "CONTEXT" MEANS AT THE DATABASE LAYER

Planner statistics

The map Postgres's query planner routes by, like a GPS.

EXPLAIN vs.
EXPLAIN ANALYZE

The route it plans vs. the route it actually drove.

pg_stat_statements

A running tally of the most frequent and slowest queries.

Indexes

Faster lookups; every write updates the index too.

The summer that set this table

APR 30	pganalyze opens its MCP server: curated stats only, no direct database connection	POSTGRES
MAY 20	Glyphic renames to Airspeed, pitching a "system of action"	SIGNAL RICH
JUN 15	Xata archives its standalone AI database agent	POSTGRES
JUL 23	HubSpot opens Agent Hub and Agent Builder in public beta	SIGNAL RICH
AUG 9	OpenAI discontinues ChatGPT Atlas as a standalone browser	ZO
AUG 30	OpenClaw, the self-hosted personal agent, ships 2.0	ZO
SEP 1	GitHub lets Copilot code-review approvals count toward required reviews	FRONTIER
SEP 8–9	GitHub adds managed sandboxes and admin-set agent permissions to Copilot	FRONTIER
