DATOLOGYAI CURATION STUDIO LAUNCH · OCT 27

These four numbers don't add up

6x compute multiplier

\+ **<1%** of pretraining tokens

\+ **~$450K** one final training run

\+ **<20%** of training compute

= ~~**ROI**~~

Same launch, five different baselines

NUMBER	AGAINST WHAT / MEASURED ON	PUBLIC SOURCE?
6x compute	Datology's 39-dataset public baseline (built by Datology) Studio-curated public data	Yes launch post, Oct 9
~1/5 compute	30B-A3B baseline, 1T tokens 12B-A1.4B curated model, 440B tokens	Yes launch post (not TR)
<1% tokens	15T pretraining tokens, 8B model TR April testbed: 100B legal tokens	Yes Datology, Apr 9
~$450K	~$40M program (press; durations differ) TR Thomson final training run	Yes Datology, Sept 3
<20% compute	"strongest public data baselines" TR, per the invite	Not found as of Oct 26

A refinery that runs in your cloud

Sources: Datology Curation Studio launch post, Oct 2026 · explainx, Oct 2026

Before you buy a data refinery

ASK	A GOOD ANSWER NAMES…
What's the unit?	seat, tokens, compute share or outcome, plus a typical first-deal size
Against what baseline?	who built it, and whether it was compute-matched
Which number is yours?	a result on your data, scored on evals held out of curation
Who reruns it?	who re-curates when the base model changes, and the cost

DatologyAI Curation Studio launch · Oct 27, 2026
