01 · THE NIGHT BEFORE

The seller out-built the co-founder

NIGHT BEFORE DEADLINE

Ramp co-founder Gene Lee posts a live-call copilot

JACK'S CALL

“closer to the problem”

NEXT DAY

Mo ships

TWO WEEKS LATER

Mo wins Ramp's first AI hackathon

> Built in one week in April, on a couch, between deals.

Source: Jack (Ramp), GTM Intelligence: AI Night, Oct 2026

Alex Yedi

02 · STEP 1 · PLAN

Plan mode, then brain-dump everything

HOLD A BUTTON AND SAY: voice · Wispr Flow

- ☐ What I want to build
- ☐ Why
- ☐ What I want to solve
- ☐ What I'm nervous about
- ☐ What I don't understand yet

END WITH `ask clarifying questions.`

First pass ≈ 60–70% of the way there. That's where most people quit.

Source: Jack (Ramp), GTM Intelligence: AI Night, Oct 2026

Validate, calibrate, “Not fast enough” ⏎

01

Let it build

(you keep selling)

02

Ding: validate the piece

e.g.

Transcription layer built from scratch, so it works on Zoom, Teams, any call

03

Check the North Stars

SPEED ACCURACY

04

Tell it what's off

```
Not fast enough ⏎
Not fast enough still ⏎
```

REPEAT

Every single aspect of Mo.

Source: Jack (Ramp), GTM Intelligence: AI Night, Oct 2026

Then it hits the laptop wall

01
Launch

02
A few hundred downloads, used a lot

03
Asks: research interviews, CX

NOT BUILT YET
Salesforce write-back

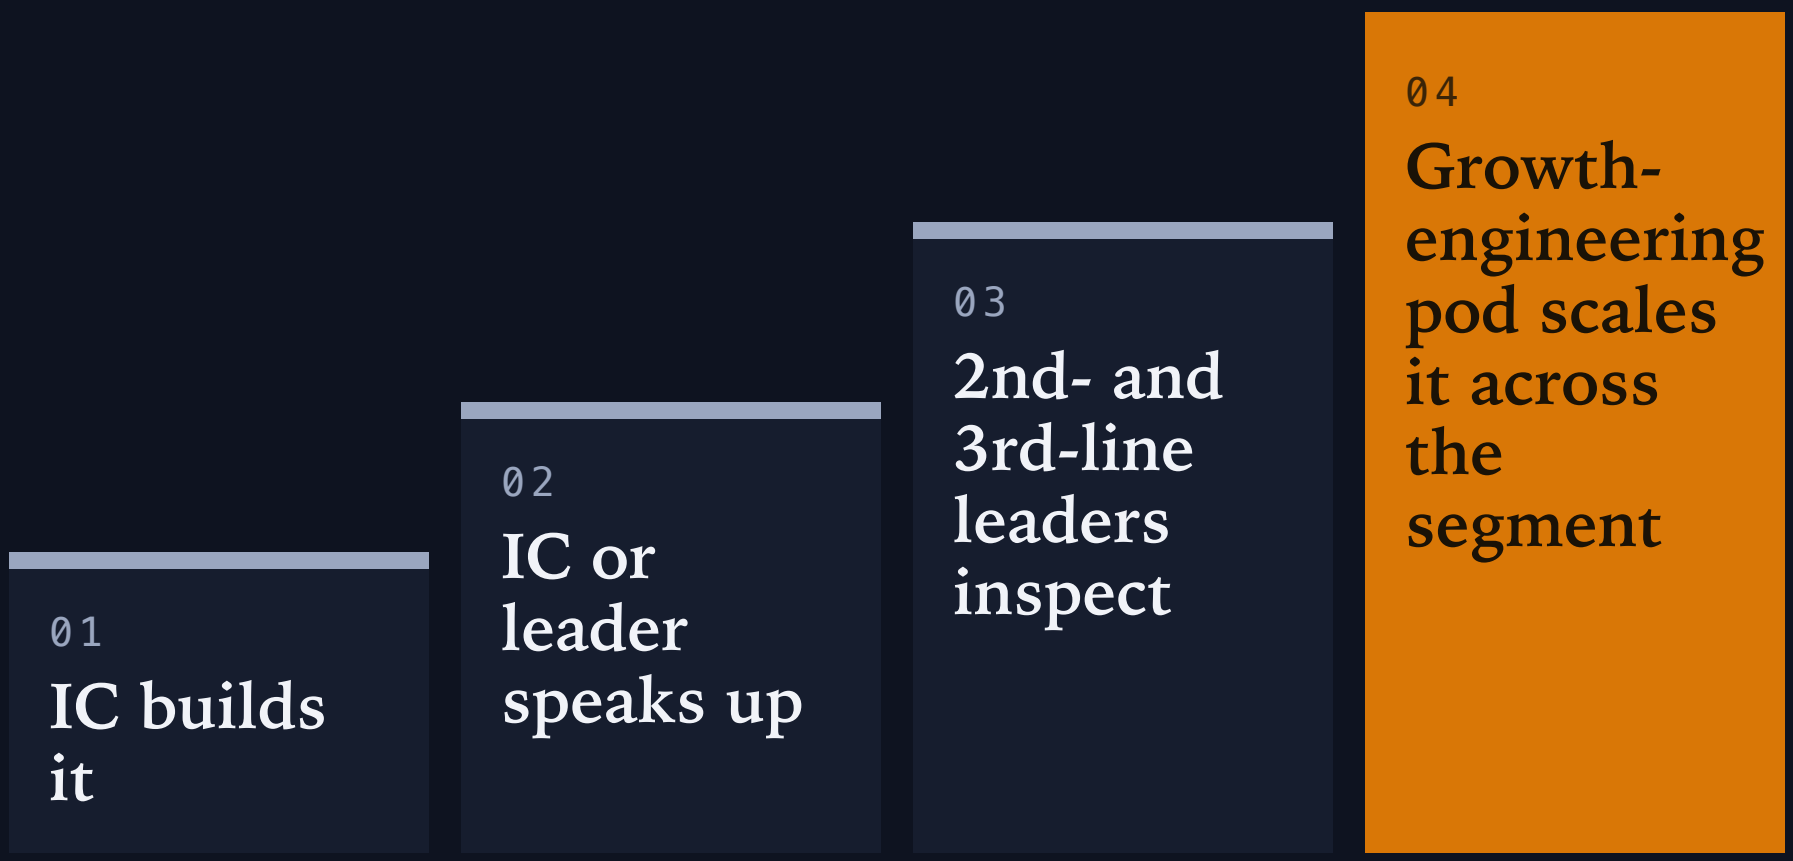

TODAY
Local devices, mostly sellers

> “Distribution is really hard.”

Source: Jack (Ramp), Q&A, GTM Intelligence: AI Night, Oct 2026

Alex Yedi

How a seller's tool gets out

Done once already: another rep's deal-maintenance tool took this path.

What's on your laptop that should be on your team's?

Source: Max Freeman (Ramp), fireside, GTM Intelligence: AI Night, Oct 2026
