REVOLT! 2026 · DAY 1 · OCT 14

One meeting cost $9,311.

Joey Gilkey (TitanX) walked it down a five-rung ladder. Here it is redrawn, with each rung labelled for what it is.

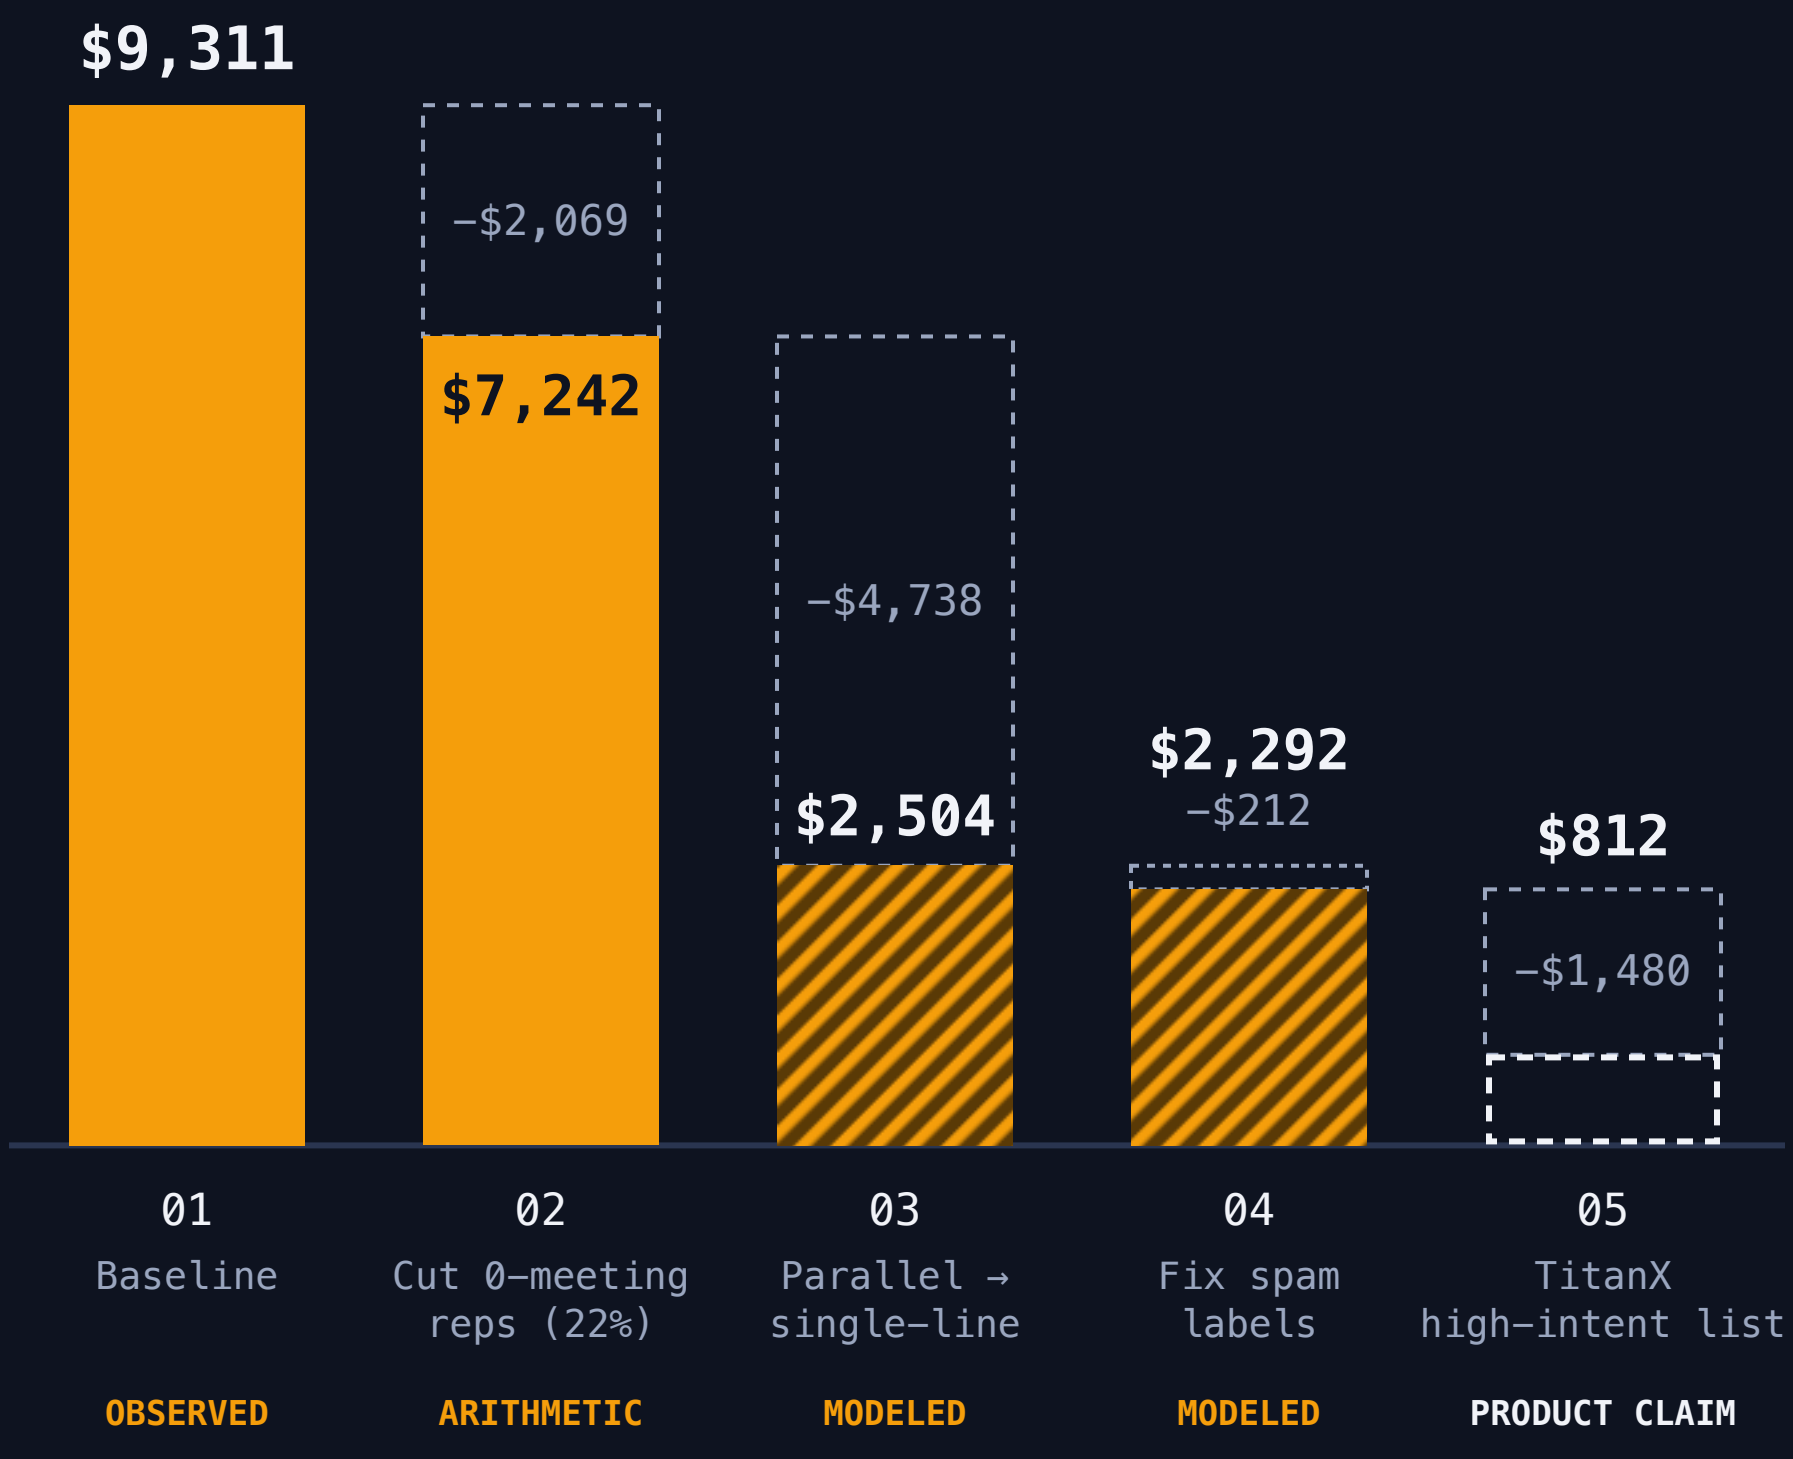

$9,311 → $812

Which rungs were measured?

THE LADDER, RUNG BY RUNG

Only the first two are measured

Observed / arithmetic Modeled TitanX product claim

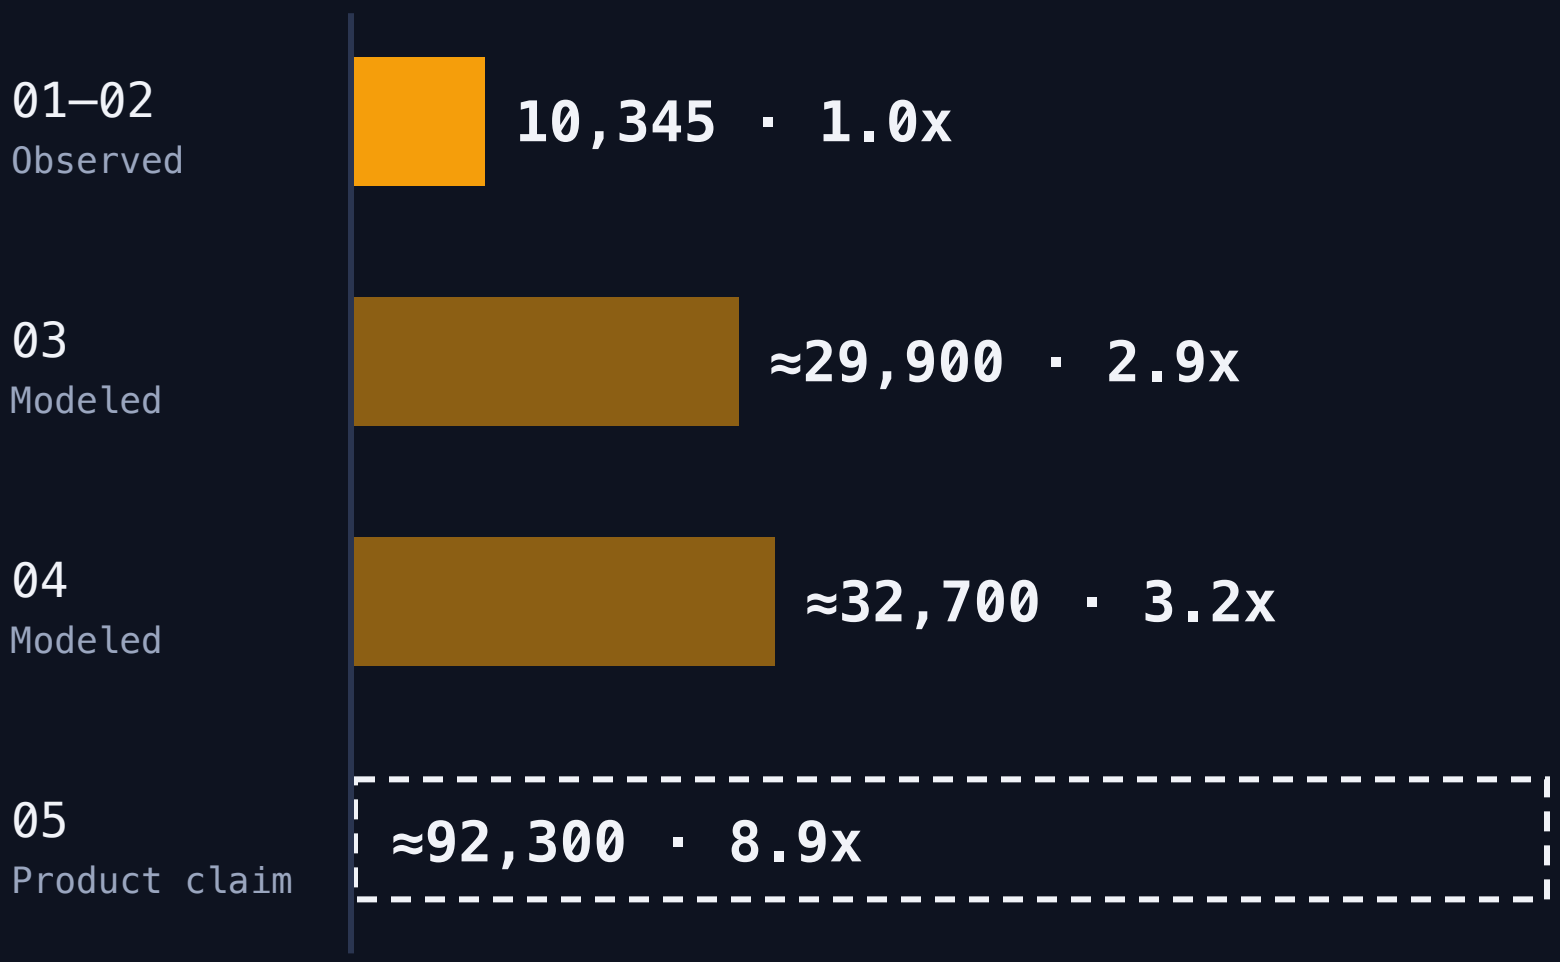

Data: TitanX (Titan Arena), Revolt! 2026 — method unpublished. Baseline: 1,204 reps, $80K OTE, 10,345 meetings. Labels: Alex Yedi.

WHAT THE MODEL ASSUMES

Same ~940 reps. 3x the meetings?

Hold the payroll after rung 02 fixed. Each lower cost per meeting implies this many meetings a year.

Biggest single drop on the ladder = rung 03, a model.

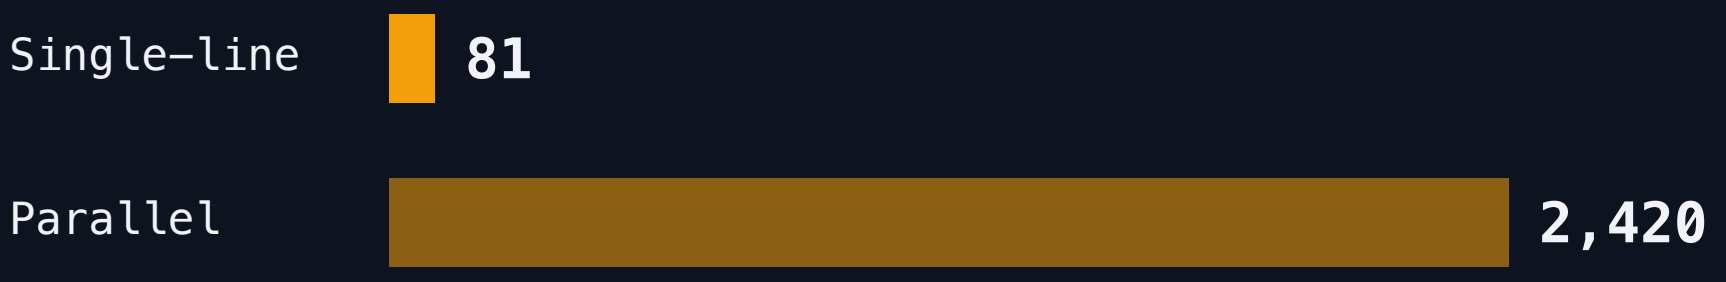

My arithmetic off TitanX's slide: ($7,242 × 10,345) ÷ each rung's cost per meeting. Data: TitanX (Titan Arena), Revolt! 2026 — method unpublished.

WHAT RUNGS 03 AND 04 REST ON

One case study. One spread.

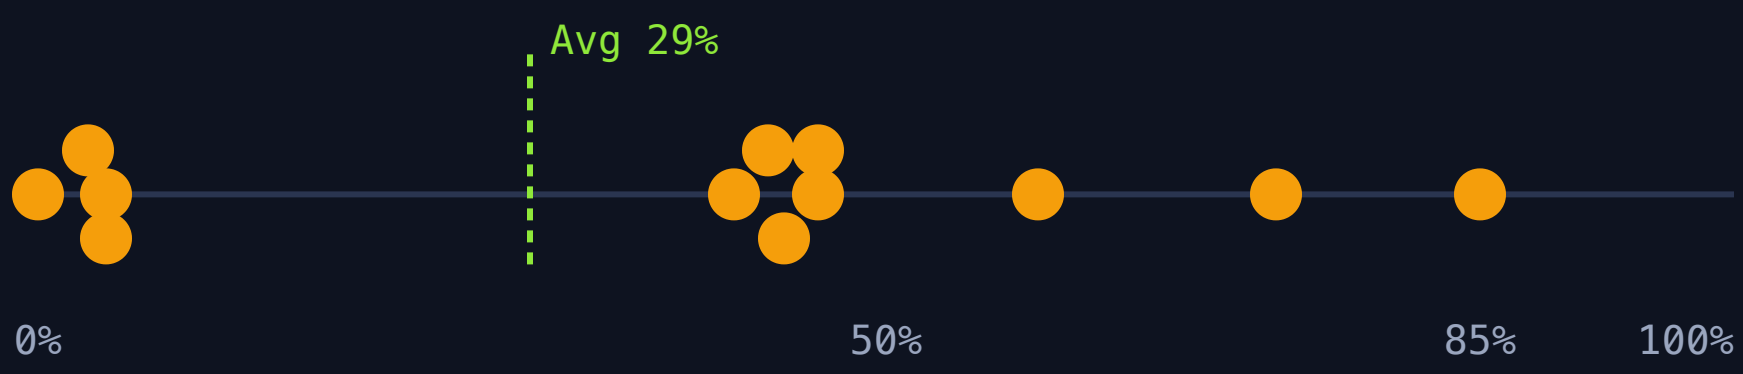

RUNG 03 · DIALS PER BOOKED MEETING · ONE CUSTOMER, 12 MONTHS

Same list, same reps: 30x apart

RUNG 04 · SHARE OF DIALS ON SPAM-FLAGGED NUMBERS · 12 TEAMS

0% to 85%. Same market, same phones.

Data: TitanX (Titan Arena), Revolt! 2026 — method unpublished. Case study customer unnamed; team sample frame not stated.

BEFORE IT GOES IN A 2027 PLAN

Pull the free rungs first

02 **Cut zero-meeting reps**
A management decision — NO PO

03 **Test single-line on a matched slice**
30 days, your list, your reps — NO PO

04 **Audit your number labels**
Know your own spam share — MEASURE

05 **Wait for the method**
Titan Arena opens Nov 1 — VERIFY
