

The data stack, before 2026

INGEST

copy raw data in

Fivetran

TRANSFORM

reshape in the warehouse
(ELT)

dbt Labs

ORCHESTRATE

run steps in order,
retry failures

Airflow · Prefect · Dagster

BI

show the business

Sigma · Looker · Tableau

Pick the best tool at each station. Swap any of them out.

The same stack, eight weeks later

MERGED Fivetran + dbt Labs · closed Jun 1, 2026 · ~\$600M combined ARR

INGEST

copy raw data in

Fivetran + dbt Labs

TRANSFORM

reshape in the warehouse
(ELT)

Fivetran + dbt Labs

ORCHESTRATE

run steps in order,
retry failures

ACQUIRED

Prefect

acquired Dagster Labs, Jul 2026 · both products continue

BI

show the business

INDEPENDENT

Sigma

\$80M at \$3B valuation, May 2026

Sources: Fivetran press, 2026; Prefect, 2026; Sigma Computing, 2026

Three moves, one stated reason: agents

Fivetran + dbt Labs

MERGER

“the data infrastructure for trusted AI agents”

Prefect + Dagster

ACQUISITION

“Dagster defines outcomes, Prefect executes, FastMCP governs access”

Sigma

RAISE TO STAY INDEPENDENT

repositioning toward *“agentic analytics”*

Same destination, different routes

Sources: Fivetran press release (Jun 1, 2026); Prefect acquisition announcement (Jul 2026); Sigma Series E announcement (May 2026)

Rollup or independent: what each trades

ROLLUP

GETS

- Fewer integration seams
- One contract, one renewal

GIVES UP

- Fewer exits if the roadmap drifts

INDEPENDENT

GETS

- Best-of-breed choice at each station
- Swap freedom

GIVES UP

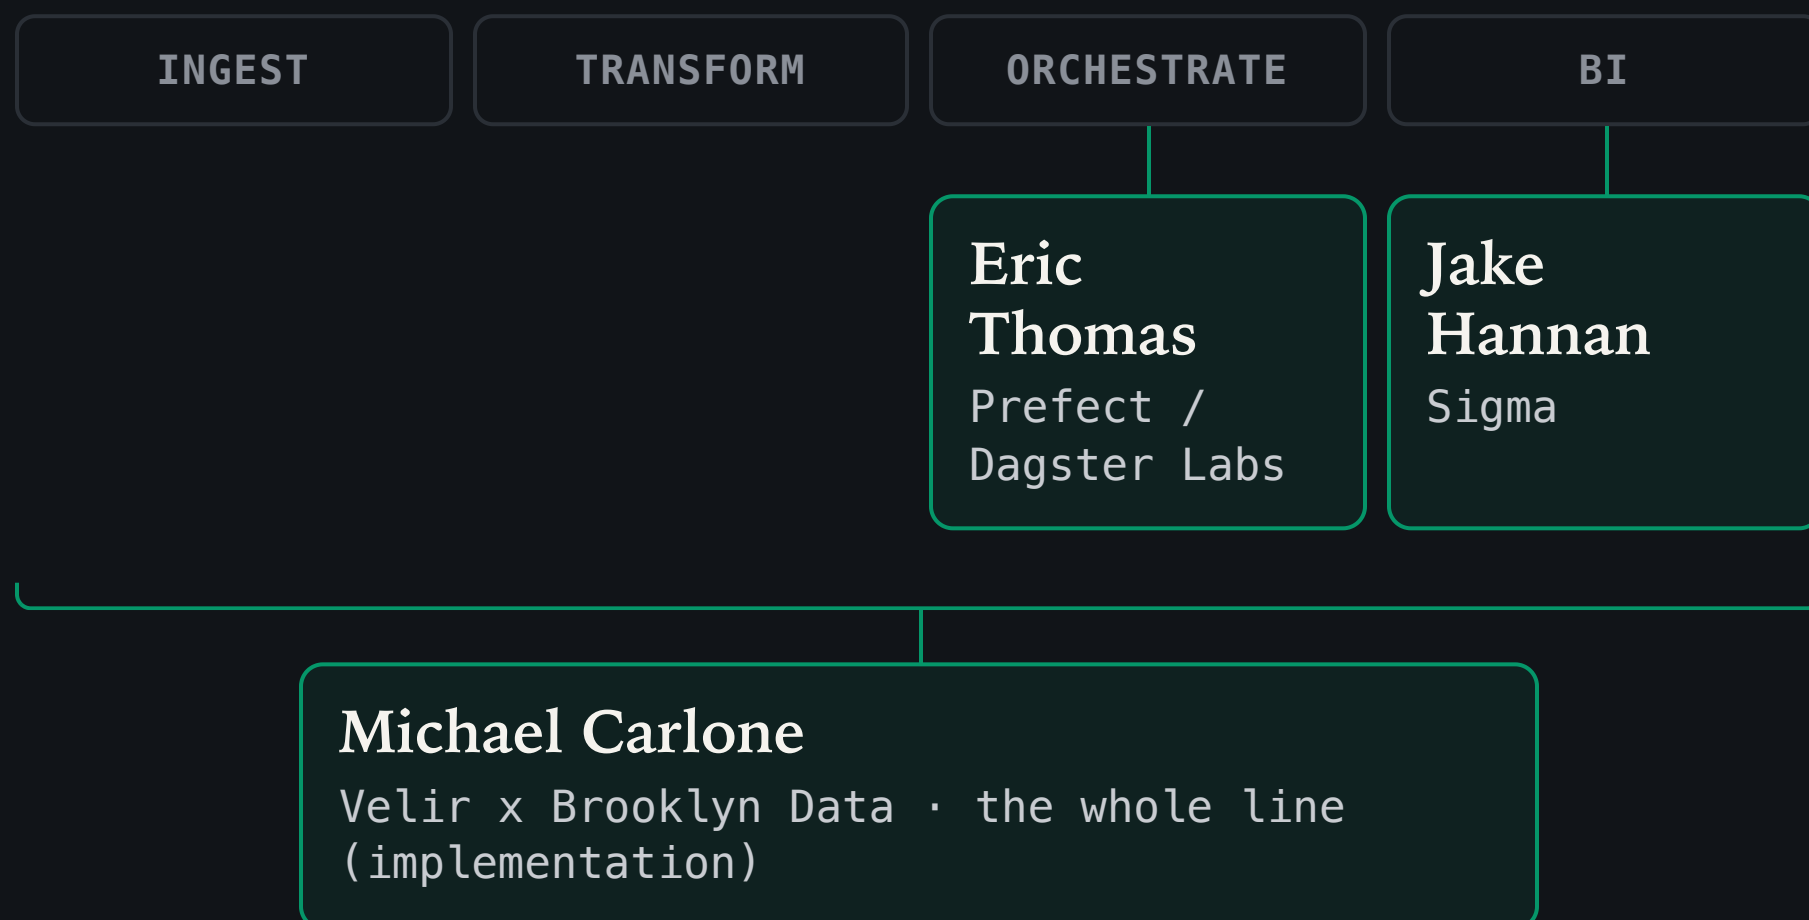

- More integration work owned by the team

The field is split on which side wins. Neither is the verdict.

THE OPEN QUESTION

Does any of this change your job?

The question for Wednesday's New York dbt Meetup, a dbt Summit 2026 recap panel.

Organized by Brooklyn Data · hosted by Sigma, NYC
Panelists: meetup.com/nyc-dbt-meetup
