NYC AI · WEEK OF OCT 12

One agent, six rooms

Monday to Saturday, the city's AI calendar walks the whole stack, from memory to the sales floor.

MON TUE WED THU FRI SAT

READ IT BOTTOM TO TOP

The week is a stack

SAT 10/17
The sales floor
Can it sell, and who scores it?

FRI 10/16
Safeguards
How do you show it's safe?

THU 10/15
Virtual: Maven
The room that travels

WED 10/14
Network and power
Who gets to build it, and on what grid?

WED 10/14
Reasoning
Do more agents think better?

TUE 10/13
First users
Does anyone actually use it?

MON 10/12
State
What survives when the process dies?

Sources: event pages (Luma, Maven), Oct 2026

NO VERDICTS YET

Where the field splits

ROOM	ONE CAMP	THE OTHER
STATE	A database keeps it	The runtime or workflow engine keeps it
FIRST USERS	Launch and distribution first	A painful, specific workflow first
REASONING	More agents, better answers	One agent holds up at equal tokens
INFRA	Demand: backlogs keep growing	Permission: power, sites, permits
SAFETY	Contain it in a sandbox	Prove it with policy, traces, evals
SALES	Augment the rep	Sell full autonomy

One question, six floors.

How do you know the agent did what it said?
